

## **DISCRIPTION**

**VALVE SERVE BODY CAVITY AVS - 77** is Proprietary blend of semi-synthetic compound designed specifically for sealing severe valve seat leakage in downstream seating ball and gate valve. Cycle in the valve to the fully open position. Flush the body cavity with an approved solvent solution in case contaminants have collected in the body cavity. Inject **SEALANT** seal into the seat sealant system.do not overfill the body cavity.

Do not exceed the maximum body pressure rating.

**VALVE SERVE SEALANT BODY CAVITY** seal is the ultimate emergency valve sealant. Ideal for use at offshore platforms and sub-sea valves.

#77

Available Packing  
18. Ltr / Pail

## **BODY CAVITY(special)**

### **Product Specifications: AVS – 77**

<b>Color</b>	:	Light Blue
<b>Base Oil</b>	:	Semi-synthetic
<b>Drop Point</b>	:	> +260°C or > +500°F
<b>Texture</b>	:	Thick Paste
<b>Pressure</b>	:	15000PSI
<b>ASTM Penetration</b>	:	225-270
<b>Compatibility</b>	:	Excellent
<b>Solvent Resistance</b>	:	N/A
<b>Special Additives</b>	:	VespeI
<b>Particle Size</b>	:	Semi-micronized
<b>Temperature Range</b>	:	-29°C to +170°C -5°F to +336°F
